# FIRE PITS

Thanks to a super-efficient smokeless burn created by a Signature 360° Airflow Design, the days of dodging campfire smoke are over.

Strategically placed holes in the double-wall structure draw in air from the bottom and feed the heated oxygen to the top, resulting in a spectacular secondary burn. The best part? Nearly no smoke and minimal ash left to clean!

FIRE PITS

# COOKING SYSTEM

The Fire Pit Cooking System was designed specifically for Solo Stove Fire Pits. Cast iron is simple to maintain, and the even-heating creates the perfect open fire cooking experience.

## COOKING SYSTEM

The Fire Pit Cooking System includes Hub, and your choice of Cast Iron cooking surface. It's completed by our Gloves, Cast Iron Scrubber, and Cast Iron Seasoning Oil. The most natural thing in the world is cooking over a fire. Now, you can do it over your Solo Stove fire pit.

# LID

Lid was designed with gathering in mind, making your fire pit even more of a centerpiece. Use Lid as a tabletop or as a temporary cover to keep out rain and dust when your fire is completely out.

## LIDS

Lid turns your fire pit into a stylish tabletop to place your drinks, chips and dip, or even your cards on before it's time to get a roaring fire going.

# HOW IT WORKS

#### 1- Secondary Burn

Vent holes near the top of the burn chamber allow preheated oxygen to fuel the flame, resulting in a more complete combustion and a hotter fire with less smoke.

#### 2- Precision Base Plate

Allows oxygen to feed directly to embers from below. This helps to burn fuel faster and hotter, while allowing consumed ash to fall through the base plate.

#### 3- Ash Pan

Catches loose ash and prevents it from clogging vital airflow. The ash pan also acts as a heat shield preventing your fire pit from scorching the ground beneath it.

#### 4- Airflow

Rising hot air and the absence of oxygen created by the combustion process pull air through the bottom vent holes. This air movement fuels the fire at its base while also providing a boost of preheated air through the vent holes at the top of the burn chamber.

# GRILL

A whole new charcoal grilling experience, allowing the whole family to enjoy the fun of cooking. Think of a hibachi-style experience around a charcoal grill.

- 360° Airflow Design™
- Seated grilling
- Easy to start

GRILL 

The Solo Stove Grill creates a 22" cooking height that invites everyone to pull up a chair and cook together. Use less charcoal, get cooking faster, and enjoy ideal cooking temperatures.
